

CALFAST PLUS

Calfast plus is a solution that for its specific features is aimed to frequent use in all animal species when you need to prevent or repair calcium lack syndromes during its growth or production.

Intestinal absorption of calcium ions and their entrance in the stream may be handicapped by a number of endogenous /exogenous Factors such as :

1-The easy de - mixing of macro - minerals in the feed and their tendency to segregate from the mass and to deposit at the bottom of any containers

2-Digestive disorders of various natures limiting the freedom of calcium ions in the intestinal lumen.

3-Genetic factors related to a limited capacity of feed intake.

4-Excessive liberation of calcium from the bones as a physiological replay to the need of calcium ions for egg-shell formation.

5-Cage stress .

COMPOSITION PER ML:

Calcium Glycero-Phosphate(in a bio- available form) (300mg)
Vitamin D3 (200iu)
Vitamin H (d-Biotin) (100mcg)

INDICATIONS:

1-CALFAST PLUS assists rapid growth and skeleton formation in all animal species.

2-CALFAST PLUS is indicated as a bio- available calcium supplement in cases of acute or chronic hypocalcaemia typical of very young animals in rapid growth (chicks)

3-In new physiological statuses where an increased calcium intake is needed (post -partum in bovin and ovine or in the phases of peak deposition in laying hens) in pathological situation (such as toxicosis , etc)

4- As an immunostimulant .

5-Increase egg-shell quality and strength of layers and increase hatchability in breeders .

DOSAGE

In all animal special 150ml /100ml drinking water

Acute cases 150 ml /100l drinking water

Chronic cases 75ml /100l drinking water

To improve egg shell quality and strength.

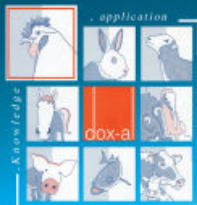

We suggest a program :

100ml / 100l drinking water/2days - week

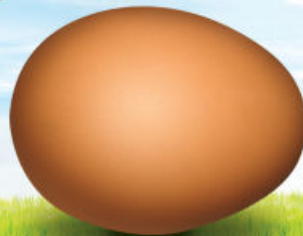

For one day old Chicks at :

100ml /100l of drinking water for 7-10 Consecutive days

Withdrawal time : Nil
